Table of Contents

1 Basic principles	1
1.1 General.....	1
1.2 Development of fibre optic cable technology.....	1
1.3 The principle of optical message transmission.....	2
1.4 Advantages of fibre optic cable technology.....	2
1.5 The fibre optic cable (FOC).....	3
1.6 Dispersion.....	6
1.7 Attenuation.....	7
1.8 Transmitting elements.....	8
1.9 Receiving elements.....	11
1.10 Connectors for fibre optic cables.....	12
2 Safe handling of equipment	13
2.1 Information for working with hps equipment.....	13
2.2 Safety regulations for handling lasers.....	13
3 Experiments with fibre optic cables	15
3.1 Calibration characteristics of the reception diode for plastic fibres.....	15
3.2 Power characteristics of transmission diodes for plastic fibres.....	17
3.3 Calibration characteristic of the reception diode for glass fibres.....	20
3.4 Power characteristic of the transmission diode for glass fibres.....	22
3.5 Measuring attenuation on fibres.....	25
3.5.1 Basic principles.....	25
3.5.2 Measuring attenuation on plastic fibres.....	27
3.5.3 Measuring attenuation on glass fibres.....	30
3.6 Measuring attenuation at connecting points.....	33
3.6.1 Basic principles.....	33
3.6.2 Error simulation with the <i>Optical Bench</i>	36
3.6.3 Error simulation without the <i>Optical Bench</i>	39
3.6.4 Power characteristic of a diode for plastic fibres with attenuator.....	42
3.6.5 Attenuation of an ST glass fibre coupling.....	45
3.7 Transmission of AC voltage.....	47
3.7.1 Analog modulation.....	47
3.7.2 Transmission of a sinusoidal signal in intensity modulation.....	48
4 Interference sensitivity of different transmission media	51
4.1 General.....	51
4.2 Interference sensitivity of a two-wire line.....	51
4.2.1 General.....	51
4.2.2 Transmission of a sinusoidal signal on a two-wire line.....	54
4.3 Power matching.....	58
4.3.1 General.....	58
4.3.2 Checking the output side internal resistance.....	58
4.4 Interference sensitivity of a coaxial cable.....	59
4.4.1 General.....	59
4.4.2 Checking the interference sensitivity of a coaxial cable.....	59
4.5 Interference radiation and tapping security.....	62
4.5.1 General.....	62
4.5.2 Tapping a two-wire line.....	62
5 Experiments with lasers	63
5.1 General.....	63

5.2 Physical principle	63
5.3 Properties and operating behaviour of semiconductor lasers	65
5.3.1 General.....	65
5.3.2 Radiation power-current characteristic.....	65
5.4 Spectrum	66
5.5 Modulation	66
5.6 Safety regulations for handling lasers.....	67
5.7 Technical data of the laser diode.....	69
5.8 Recording the laser diode characteristic	72
5.9 Signal transmission	75
5.10 Measuring the laser diode characteristic with the oscilloscope	77
6 Propagation speed, refractive index and numerical aperture	79
6.1 Basic principles.....	79
6.2 Determining propagation speed, refractive index and coupling angle.....	80
7 Principle of backscatter measurement.....	82
7.1 OTDRs / reflectometers for error detection	82
7.2 Proving reflection of light at faults on the fibre optic cable	84
8 Technical data.....	86
8.1 Transmission diode (660 nm).....	86
8.2 Transmission diodes (850 nm)	88
8.3 Laser diode.....	91
8.4 Plastic fibre	94
8.5 Glass fibre	95
8.6 Reception diodes	98

Solutions

Overhead transparencies	F1
<i>Fibre Optic Transmitter Board (Type 4290).....</i>	<i>F1</i>
<i>Fibre Optic Receiver Board (Type 4291).....</i>	<i>F2</i>
